“A GOOD EDUCATION OF A GOOD STUDENT”
by Mark Yel P. Balbuena

Education is important in every aspect of our lives. It helps people to be knowledgeable for all the things that we want to learn and to achieve. It is an effort of the senior people to transfer their knowledge to the younger members of society. It also helps us to have a foundation for the preparation for our future. On the other hand, education is more than learning from books, and it is a shame that a lot of schools do not see that it is more than just a curriculum and school score. But all these things will not be possible if we don’t give importance with our education and if we do not make it as our inspiration in our lives.

In an early age of a learner, he/she should be dedicated to have a good foundation and education. Starting from kindergarten up to the highest level of education, he/she should maintain his/her interest to learn, acquire knowledge and skills, and apply those things for his/her preferred employment. A good start of education ends with a good future. It may teach us the basic skills, knowledge, academic lessons, virtues, and attitudes that may be useful for our job. Moreover, it may also teach us how to reason out to be grown up not to be ignorant.

In school, a learner should always be in good condition. He/she should have a good mood to listen, to participate in all activities, share some ideas, and follow all the school rules that will have a good result of a good education. In addition, if we are going to strive hard for our studies, we can achieve what we want and we can fulfill our dreams. We should only need to review our lessons to prepare ourselves for an exam and not to be in a hurry while we are taking it. Make it a hobby for studies so that we can get good grades and fruitful results for our family.

Aside from these things, we also need to have good values and attitudes especially in facing all the struggles and challenges that we can encounter in the future that can make us to be strong at all times. We should be an obedient student inside and outside of the school to follow the activities and tasks during class hour. We also need to be industrious and have perseverance and patience in making our homework, activities, projects, portfolios, anecdotes, and some other tasks for a particular topic. Furthermore, we should be friendly not only to our classmates but also to
our schoolmates. If we have many friends, we will be cheerful at all times so during our class, we
will listen to our teacher lively and attentively. Lastly and most importantly, we should never forget
the presence of our savior, our God, and always have faith with him.

If all these things and values will be seen with us during our studies, all these sacrifices
will be meaningful and ends with a good education. This kind of education can help us to have a
better future and to have a good quality of education. It helps us to graduate in college and to
become a professional. There are really lots of steps to fulfill our dreams but if we are going to
make it one by one, we will be successful. After getting this kind of achievements, this will be the
starting point for our employment. We have a good education and we learn a lot during the school
days, and it’s time to apply this knowledge to be a good employee of a company or to an office. If
we continuously make our sacrifices during school time for our job, we can be a best employee
that results a better future.
