A TEACHER…. A MOTHER…. 

by: 

Editha D. Bravo 
Teacher I, San Benito Elementary School 

A teacher is a simple word but meaningful in terms of responsibilities to our learners. Just like our own children. Pupils have different attitude and characteristics that most of the time they are not easy to handle their differences and uniqueness. We cannot just teach them on how to read and write but more than that we teach how to have a good manners and self-discipline in order to become a good citizens in the future.

Now a days some parents are working abroad in order to meet the needs of their family. It is considered as one of the biggest factors that some children are neglected in terms of proper parental guidance and self-discipline. They tend to seek attention in some different ways. In this situation, the teacher is the one who fulfill the needs of pupils in terms of love and care they need. Motherly approach is one of the best ways we can do to them. We serve as an instrument to nurture them in all aspects on how to become a better person not only in mind but in thought and deeds and most of all to have faith in our Almighty.
