ACCESS AND BENEFITS IN THE SCHOOL

by:
Mary Rose M. Salenga
Teacher III, Mobile ALS Teacher – Orani District

Education is for all of us and we are entitled to have it for our development and growth. The school has the vital responsibility to show access and benefits in the school setting.

The learners are admitted in school. This is to show that everyone is welcomed to the school regardless of age, gender, socio-economic status, religion and the like. The young ones and adults have the access to quality education.

They deserve to have qualified teachers. Part of the benefits in education is to have competent teachers who will guide them in search for knowledge, competencies and skills.

The school should be safe and favorable to them. The students deserve to have a school that is free from harm and conducive to learning. Disturbances and other forms of hazards have no place in the school.

They are given enough facilities. Ancillary facilities like the library, laboratory, computer hub, clinic and others are important to the students. Having sufficient tables and chairs are also essential.
They are given enough learning resources. The textbooks and all kinds of learning resources show the access and even benefits in education. The students are expected to have learning materials that support their education.

The school is responsive to their needs. There are other things in the school that became parts of the basic needs of the students and the school should be responsive in providing them. Having clean comfort rooms and other facilities are necessary.

The school is after for their health. The health well-being of the students are being taken care of by providing nutritious meals in the canteen, feeding programs and health monitoring.

The school respects all kinds of learners and they are admitted in the school for them to learn and enjoy varied benefits that are responsible to their development and growth. Accessibility to education is then combined with benefits that students must avail.
