AN IDEAL SCIENCE TEACHER

by:
Sylvia B. Atanacio
Master Teacher II, Orani North Elementary School

One of the teachers that learners are excited to meet every day is the science teacher for several discoveries are gained from a science subject.

An ideal science teacher is engaging the students in varied productive learning activities. He or she sees to it that the learners are doing challenging accomplishments which enhance their knowledge and skills.

An ideal science teacher employs different learning styles which are suited to the learners. He or she assures that learning takes place within the learner using the appropriate methods or practices.

An ideal science teacher takes into accounts the real-life or practical applications of science. The students need to know the essence of what they are doing in their science subject as to the purpose and application of each lesson.

An ideal science teacher is sensitive to individual understandings and differences of the learners. Knowing their strengths and weaknesses in science is vital. The ideal science teacher has the ability to address the students properly.

An ideal science teacher pursues professional growth and development. It is important that he or she is continuing his or her studies not just for one’s sake but also for the benefit of others.
An ideal science teaches uses technology in teaching. Since it is the digital age it is but good to practice technological application in teaching science. It is good to be interactive and innovative.

An ideal science teacher keeps on planning for the assessment or evaluation of learners. It is essential to know how far the learners understood the lessons given in the classroom.

It is worth to know the attributes of an ideal science teacher for the novice teachers to have a picture of a teacher who is brilliant.
