The expectations are getting bigger and teachers are not only for giving a good teaching services but also excellence in instructions.

**Continuous Education.** The teacher has to seek for professional education the Graduate School in order to achieve further education thus for further learning. If the teacher has acquired further degree then the skills and power to educate others would be intensified.

**Trainings and Seminars.** The teachers need to have additional trainings and seminars in order to enhance teaching skills. Additional strategies and techniques are learned during seminar-workshops. The teacher meet experts and these people teach them to be innovative in teaching.

**Mentoring.** The teacher may also achieve teaching excellence through mentoring. Mentoring can be done by the school head or a fellow teacher. This heroic way of teaching a fellow professional to improve one teaching skill is a better practice.
Conducting a Research. This is one suggested means in order to discover a problem in a classroom and then finding the solution for better outcome. Normally, it is in the form of an action research wherein the teacher conducts in the class having the students as respondents.

Demonstration Teaching. The teacher may find demonstration teaching as a way to gain mastery and excellence. Through this practice, the teacher shows teaching power and skill. Consequently, a teacher who is inclined to it delivers better education.

Benchmarking. Going to other schools in order to witness their best teaching practice is important and contributory in attaining excellence in instructions. The teaching practices from other schools may also be applicable to your own classroom.

Participating in various contests. Being indulged in different contest is truly challenging. This enables the teacher to train the learners and excellently leads them for the mastery of the lessons.

These are the ways to achieve excellence in teaching. Teachers at present may apply them for attaining excellence in teaching in developing and creating the future.
