BENEFITS OF BLENDED LEARNING

by: Glezie L. Duterte, Teacher Applicant

1. Higher teacher engagement. Teachers have more opportunities to learn and engage in the new normal. They can learn from training face-to-face or virtual, teachers have access to all useful material online at all times. Teachers can revisit this material to strengthen their understanding on their own, and meet with trainers to discuss questions and problems face-to-face.

2. More Effective. Blended learning enables teachers to learn through different styles. Only learning face-to-face can increase dependency on trainers. Being able to learn independent as well as face-to-face is empowering and motivating for teachers.

3. Increased flexibility. Teachers have more opportunities to learn on their own, at their preferred pace and time. Training instructor is no longer bound to cover everything in the face-to-face training sessions.

4. Saves time and money. Conducting online training sessions can save a lot of time and money. Examples are multinational companies often conduct training sessions in one location, and employees from other countries have to travel to be there. Renting a large conference hall to host a training session can be very expensive. Some of the hours usually takes to go over everything in a face-to-face training can now be divided between online and in-person work.

5. Improved communication. Face-to-face training by itself may not provide teachers with the opportunity to communicate effectively with the instructor, especially in large groups. Limited time allotted for the face-to-face training session, a trainers can entertain a few questions as they need to cover all aspects of the training module.
