Teacher I Balon Elementary School

Schools were forced to closed nationwide due to this pandemic brought by COVID-19. Shifting to distance teaching and learning from face to face really brought big hit to both students and teachers. DepEd offers blended learning or hybrid learning which is the infusion of online distance learning and the in-person delivery of printed materials through the help of the barangays to bring learning to those pupils who doesn’t have internet connections.

Ninety-three percent (93%) of teachers and students received over 1 million gadgets and devices where they can use as tools to make this blended learning happen but most of them doesn’t have internet connection, this is just one of the problems occur during the temporary solutions of DepEd. Aside from this, some of the teachers and students have internet connection were experiencing slow connectivity. The Department of Education always find solutions for the problems brought by this pandemic to meet the desired outcomes to attain wisdom and learning.
