BUILDING HARMONY IN SCHOOL
Written by: Beverly D. Tongol
Teacher III
Old San Jose Elementary School
Dinalupihan, Bataan

Harmony in the school is very significant for it does not only unite the people within the organization but also directs the school to good operations and management.

Primarily, harmony may start from the people who lead the institution. Having set the friendly school environment is possible if the leaders are the ones showing the best examples.

Secondly, the teachers should be in goodwill with each other. Teachers may comprise the bulk of the school manpower and having them connected, related and bonded together may produce harmony in the school.

Thirdly, developing tolerance within the hearts of people is very significant. Through this, the people in the school may create understanding among the members of the school.

Fourth, setting good attitudes and behaviors are keys to harmonizing the people in the organization. If the attitudes and behaviors of people in the school community are harmonious then an organization may be better.

Fifth, finding solution to a problem right away is another means to achieve harmony in the school. Settling conflicts and addressing them properly may lead to harmony.

Achieving harmony in the school is possible if the people in the school work together as one for a better school environment.

Working together as one and dreaming for a common goal are manifestations of harmony in the school.
