CHALLENGE

by:
Mary Ann C. Baluyot
Capunitan Elementary School

In the blink of an eye change has come to consume the entire world. Many things have changed, from the nature of work, economics and even Education. The question is can people cope up with the system of education in this new normal?

As human, in my point of view, we are very flexible to change because we have God and have faith on Him that he will help and guide us. No matter how hard it is, we can easily adopt to change having a will on us. Nothing is impossible if we accept the challenge with open arms.

As we all know, Education always takes place in the classroom wherein teacher and pupils are having personal interaction, solving math problems in group, and performs talents on stage. But suddenly it doesn’t happen this school year because of the COVID 19 pandemic. Due to this, classroom classes do not exists, instead it is now known as Class home.

Everyone (teachers, parents and learners) must have a role to play and take it to make the Class Home a better place for Education. Parents are the primary character in the new normal education. They have to motivate, guide and monitor learners. Providing them with opportunities to explore things by themselves in their class home. Teaching them doesn’t require 24/7, it is a matter of time management like teachers did in the class room. But because parents are the facilitator of learning, learners must exert extra effort and be responsible for their learning.
With the different approaches offered to cater every learner, Education is still for everyone. Learners are given equal opportunity to choose their preferred learning modality to ensure that “NO ONE IS LEFT BEHIND”.
