CHALLENGES IN TEACHING

by:

Anna Liza R. Libao
Master Teacher I, Orani South Elementary School

The teachers at present face numerous challenges that should be addressed with optimism. These are the teaching challenges that teachers owe to overcome for the success of the teaching-learning process.

The first challenge is to offer excellence in education. Since mediocrity has no place in the educational field, teachers are expected to be at par excellence in the execution of the role as a teacher and in adherence to the new curriculum. Always be at your best!

The second challenge is to win the attention of the learners to focus more on education. In the midst of globalization and in the prevalence of mechanical gadgets, the learners should give attention more to studies. This challenge entails the hard work of the teacher to make the school more inviting. Be a living hero!

The third challenge that teachers need to deal with is to gain the support and participation of the parents. The parents are much needed and a strong partnership with them is necessary. Win the parents’ hearts!
The fourth challenge is to seek the cooperation of the community or external stakeholders in carrying out activities in and out of the campus. The services that these people may contribute may lead to the realization of various school projects and activities. Involve the community!

The fifth challenge that teachers need to face is to apply Instructional Computer Technology otherwise known as ICT in the teaching activities of teacher. This is difficult for the teachers who did not acquire formal education in computer technology but teachers nowadays keep on adapting it. Be in trend!

Another challenge is improving and updating of instructional materials. Since chalk and board are already passé, modern and updated teaching materials are much required to entice the attention of students to learn. Always be creative!

The student behavior is another big challenge to a teacher. The management of classroom must coincide with the kind of behavior of the students. The teacher should manage the behaviors of the students very well so as to achieve better classroom management. Be patient!

Having heavy paperwork is a challenge to a teacher. There are reports that should be submitted on time aside from the usual lesson plans. A well-organized teacher for sure can readily adjust with this. Apply patience and endurance!

Challenges are given to be faced and teachers are ready for them.
