CHOOSING THE RIGHT STRAND

by:
Ronalyn Oberez - Estrada

Intelligence is the key to unlock the different secrets of this enormous world. It works as the sight for our eyes to see brighter aspects of life. But the intelligence of an individual doesn’t really depend on his intellectual ability but on his capacity to reason, to know or to choose his path. A path that lead to enlightenment and more secured life. Choosing who you will be demands reason and choosing what will be demands power. We all have our own views about life and we all have our own dreams. Dreams that we only achieve if we have a reason and power to manifest our intelligence. It must lead us to a specific goal. The newly revised educational system will help an individual to cultivate his desires in life. It provides complete support on one’s future by learning different things. This new education system also offers different strands that will benefits every learners to distinguish what path they will take. By doing so, it requires more time and effort from the student to cultivate his or her strengths.

K-12 education system helps to categorize different strands that a student will take. It assists to focus the learner to its ability to grow and improve its weaknesses. There are different strands to choose. ABM or Accountancy Business Management strand is for those who ought to be an Accountant and will take Business Management in college. STEM or Science Technology, Engineering or Mathematics for those who ought to take or study Pure Science or Applied Science, HUMMs or Humanities and Social Science is for those who want to take up Law, Psychology and etc. and lastly GAS or General Academic Strand is for the students who are undecided on their course in college. These strands help you to choose the right career path. These strands were created to enhance the learners intellect parallel to the new educational system. DepEd requires every student to pass through the 2-year education to make it to higher education, employment or entrepreneurship. On the other hand, several companies
require expertise in terms of professionalism and undergoing Senior High School will guarantee a higher probability to get a good quality of jobs.

The government is working its way to produce schools, classrooms and teachers to fully adapt to this change. The approximate budget for this project will generate millions of productive citizens. Millions of life will change, millions of possibilities, millions of job offerings and millions of students who aim to have a better future.
