COLLABORATIVE LEARNING IN SCHOOL

by:
Jelly P. Reyes
Teacher III, Orani South Elementary School
Orani SDO Annex

We always think on how we can extract the best from our pupils or students and think of the best ways to develop the best within them. One of the great answers is collaborative learning.

Collaborative learning is one of the suggested ways to be utilized by the teacher in school.

Collaborative learning combine ideas together. The students are asked contribute ideas, elaborations, opinions, suggestion or tenets regarding a particular problem, issue or task.

Collaborative learning contains joint intellectual efforts. The ideas, elaborations, opinions, suggestions or tenets of these students are synthesized in order to form a joint intellectual effort.

Collaborative learning establishes teamwork. In the process teamwork is developed. The students are now formed into groups having the same goal or objective to be attained eventually.

Collaborative learning builds harmony. Since the groups are formed, then the members of each group should work together harmoniously as to be successful in their effort for the group accomplishment.

Collaborative learning has a common goal. Certainly, the groups are formed through collaborative learning have one common goal to attain and all members should be focused on this goal.
Collaborative learning aims for a specific accomplishment. At the end, the groups formed may now work for the attainment of a particular product or an accomplishment of a particular task.

Collaborative learning does not only promote learning and harmony but also promote teamwork as well.
