CONTINUITY OF LEARNING IN THE MIDST OF COVID-19

by:
Janice M. Cruz
Teacher I, Sta. Rosa Elementary School

No crisis should stop one from learning. Amidst the threat of Covid-19 Pandemic, this year’s opening of classes was faced in a rebuttal. But, the learning must continue even at the comforts of our homes. As the pandemic continue to spread worldwide, private and public schools, business establishments, offices and others experience this unexpected downfall. Schools have been closed resulting for the disrupted learning progress of children.

DEPEd Secretary Leonor Magtolis Briones, said: “We can continue operating, we can continue sharing and we can continue teaching, with COVID-19 or without COVID-19.” Thus, the Department of Education prepares Learning Continuity Plan (LCP) for the school year 2020-2021 to ensure that the learning continuous even at home. Different learning delivery modalities like distance learning and blended learning approaches are taken into considerations while face to face learning is prohibited by the government until vaccine is available. Learners may use online platforms, digital and printed modules, TV and radio based instructions. Teachers and parents are rapidly transitioning from traditional classroom learning set-up to learning from home through online resources. Educational innovations discuss through webinars, will lead us to new and powerful solutions to make this school year be more accessible and possible.

It takes two to tango, therefore, teachers and parents must work hand in hand in guiding our learners in this new normal education. Schools with the aid of every teacher must continue to serve its purpose – to educate.
