Teacher III, Orani National High School Parang - Parang

There are various motivations to push entrepreneurship among children. Skills as basic ability area is a life changing factor. Competencies of entrepreneurs, if determined at early stage of the education, could contribute to the advancement of potential venues for the event of entrepreneurial inclinations. The Personal Entrepreneurial Competencies of a person supported the following: persistence, opportunity seeking, industrious, brick uncertainty, handling failure, risk taking, goal-oriented, information-seeking, systematic designing and observation, building for the longer term, setting own standards, certainty, demonstrating initiative, persuasion and networking, responding to feedbacks and building on strengths.

Ensuing from these entrepreneurial competencies, the projected entrepreneurship program can replicate the thrust of the teacher to drill entrepreneurial competencies forward the students. The target of the program is to show students to place theory into observe and to know what entrepreneurship is concerning. During this means, students assumed to realize certainty and motivation, become proactive, inventive and find out how to figure in an exceedingly team. There are numerous fields on what make somebody a business person and what an entrepreneurial ability is. A business visionary can be characterized as the person who sorts out, oversees and expects the need of a business undertaking. It can be characterized as a man who has chosen to take control of his future and ends up independently employed whether by making his own particular exceptional business or filling in as an individual from a group at a multi-level occupation. He is a man who has ownership of an endeavor or wanders and expects critical responsibility for
the intrinsic dangers and the result. He is a goal-oriented pioneer who joins land, work and funding to make and market new products or administrations. Subsequently, entrepreneurial abilities are aptitudes needed to prevail in business, most particularly in teaching. Entrepreneurial aptitudes are the basic capacities important to enable you to begin, create, fund and prevail in your home enterprises.

Filipinos have been prepared to discovering work subsequent to completing formal training. Tough economic times, furious competition in the job market and high unemployment rates make starting one’s own business an attractive alternative to employment in terms of finding a means of livelihood. Entrepreneurship is also gaining popularity as business and political leaders realize that it is a means for economic growth in the country. With a rapidly changing business environment, a person is faced with developing entrepreneurial skills that would assist them in innovating competitive products and services, in creatively solving problems and taking advantage of opportunities, in managing risk, and in making other tough decisions.

The instructive framework has reacted to the requirement for business enterprise through the advancement of curricular projects outfitted to build up the youthful Filipino entrepreneurs. It is discovered that each student has the potentials to make these huge opportunities, and by that, it is his obligations to exchange and teach these information, build up the aptitudes and qualities of his colleagues towards independence and certainty to be more beneficial person.
