Numbers…figures…statistics…are continuously rising. Every time we open our phones, televisions, and even the rumors around is about the COVID-19. It’s alarming and stressful experience for all of us because we are used to the things that we do and suddenly it turns to end because of the implementation of Extreme Community Quarantine (ECQ). We have no choice but to follow in order to limit the spread of the virus and the least that we can do is to obey the rules.

We are already in the midst of this pandemic and we need to accept the scenario that we are facing. Let us see the brighter side of life that in spite of this negative event that happens there is still the opportunity to be worthy and productive. We have no one to blame but we have things to do in order help our community fight this crisis. Let us ignite the positive spirit of embracing the opportunity that can help our country to surpass these trials that we are facing.

Strengthening the value of sustaining the agricultural production by extending the Gulayan sa Paaralan (GPP) by reiterating “Gulayan sa Tahanan” as a practice of planting vegetables in our respective homes that will serve as main source of ingredients for our cooking. We can start putting up a garden for minimal spaces by utilizing the different garden models which is suited to our location. We can ensure that the vegetables that we eat are safe and healthy to eat.

Divert your time to become productive by utilizing the materials and using space that are available in your respective homes. There are many ways to do in order to start a garden that will can sustain our needs until ECQ is lifted. At least you have become
worthy and productive individual as you practice your lifelong skills in Agriculture. Intensifying a good practice of planting will also be the avenue to inspire and influence others to be in the line. As the advent of technology nowadays, it is easy then to catch the attention of others by using social media. Apparently the trend of giving CHALLENGE in different ways to mitigate others to help for the campaign to fight against COVID-19. This practice will turn into a good habit that will also help the people of our community since majority have access to technology and willing to share by posting their salient features of accomplish gardening progress. It will turn that every home would have available ingredients for cooking.

Social media will be now our flat form to spread the positivity’s for a brighter and greener perspective about life where we can POST good shots, SHARE good messages, and FLOODLIKES ot the value of GARRDENING. For this we can fill the NOTIFICATIONS with different EMOJI on what we feel about the line........”AGRICULTURE IS LIFE.”
