Mariveles National High School-Camaya Campus

In the field of Education the research and curriculum of K-12 program define as a basic education or Technological Vocational and Livelihood Program covers a kindergarten to Senior High School (SHS) is two years a total of 12 years learning experience.

As a starter this lesson will define K-12 every learning process will give enough time for some of your frustration, but look at some more specific ways of concept and skill development and higher education of your learners.

The overarching goal of the K-12 curriculum and every Filipino learners of 21st century who is prepared for work. Your learning should be boost and develop their interest and knowledge in welding and encourage you to give your best performance in the course or subject to accomplish even more and prepare the tertiary education.

Let us not waste our time if we want to change let us change and improves our selves our attitudes or our views.

If you wish to achieve worthwhile things in your personal and career life you must become a worthwhile person in your own self-development and this will support you enough for you to start for the basic is the finest techniques for you to become a quality welder within the future because there are no shortcut in learning and practice makes perfect.

Chasing perfection lead to excellence.
Welding Technologies are indispensable for fabricating such structures in almost all industries as still buildings ships and offshore structures and introductory course of shielded metal arc welding national certificate level II (NCII) and it has 4 common competencies like

1. Use basic hand tools and equipment
2. Mensuration and Calculation
3. Applying safety and Practices
4. Interpret Plans and Drawing

The original certification standard of ISO 9000 series defined the welding process as “a special process” and then ISO 3834 defined quality requirements for welding technologies and certification of technical levels have been recognized to be more important while studying they also be asked to demonstrate what they learned by participating in class activities that may include the following.

These competencies can only be acquired of course I order to ensure qualities of course sufficient knowledge for the first priority and to be cognizant of this thoroughly at all time. The conceptual of framework of the teaching of TLE is a schematic of Technology and Livelihood Education.
