E-LEARNING BENEFITS

by:
Ramil S. Gigante
Teacher III Orani National High School - Main

The emergence of more technological advances like the E-learning in this digital age paves the way for the different benefits that the people in education are currently enjoying. Due to E-learning the students nowadays are more interested and engrossed in technology.

E-learning per se refers to the utilization of electronic technology in the teaching-learning process. It contains processes and concepts for learning with the aid of technology.

E-learning enhances the student’s engagement. The students tend to participate in the discussion and are able to indulge in the different activities that the teacher prepared for them.

The utilization of E-learning improves the retention of knowledge among the students. They are able to grasp the ideas easily to interactive learning brought by electronic instructions.

The use of E-learning stimulates student’s self-learning. The accessibility of knowledge in E-learning that is evident in the process motivates the students to have their own self-learning, leading to personal initiative to learn more.

E-learning may develop collaboration among learners. Since the students may easily communicate through E-learning, the sharing of ideas among them is possible and feasible.
Likewise, E-learning is also useful in learning various skills. The power of technology leads to the acquisition of more useful skills that are applicable in school and in the work in the future.

Also, E-learning provides an array of information. It accommodates the needs of learners. The students may readily search for the ideas required in their classes as well as their own personal preferences.

It is also economical and time-saving. The students do not need to spend more money just to go to different places in search for information and they may save time since the information may quickly be accessed.

E-learning also updates the student with the latest contents and even current issues. Through technology, they are able to watch significant information, events and happenings.

Through E-learning, the student’s education becomes easier, simpler, more accessible and more effective. Indeed, E-learning is one good example of a recommendable trend in education.
