Orion Elementary School

Enlightening the mind of the students with different skills and abilities is one major obligation and duty of teachers. Values and virtues are also taught in school where students can apply and practice in their everyday living. Most of the time parents are the partners of the teachers in molding and disciplining the learners. Their collaboration has a big impact to achieve their specific goal, which is to provide quality education.

Different styles, techniques and strategies are used by the teachers so they can easily motivate the learners. Now a day teaching students is a very difficult task. Teachers should have enough patience for them to catch and motivate their students very well. Most of the time they have a very hard time to handle and manage their class.

Utilizing the skills and abilities of the students is also a major duty of the teachers where they should bring out the best in them. Talents and potentials in different fields and subject areas are also discovered with the help of this technique.

Capturing and catching every single moment with the students is also a big help for teachers to know them better. Let them feel that they are loved and part of the institution no matter what.
Attending class for sure is their main priority once they feel that they are truly welcome in school. Most of the students really need attention from others. Excitement and enjoyment will push them to go to school and study.

Teachers should also know those simple things so they can easily to teach and impart knowledge and values to the students.

Intending to promote and provide quality education, which is necessary for the students’ success. And for teachers that is a big accomplishment and attainment.

Once a teacher always a teacher. Responsibilities and duties should be performed well and accordingly. Always find solutions whatever problems they may encounter.

Never ever give up and quit to teach, develop and help the learners to learn. Always make legacy that will mark to the community and most especially to the students. Input in their minds that education is very important that everyone can have and attain.
