EDUCATION: DREAM WITH PASSION

by:

Marvin E. Orcena
Teacher III, Bataan School of Fisheries

Education? Dream? Passion? How important can they be? As important as your life? Maybe! But what if they are combined together? What impact will it make?

Education is the field of study that deals with the methods and problems of teachings. It is knowledge, skills, and understanding that you get from attending a school, college or even university. Education is the action or process of teaching especially to someone who attends school or college. It is not actually just about the knowledge you got from school. It is about the knowledge you get from everything you do. It is the lesson we learn from everything we do. Education is the result of studying. It is a never ending process of learning from birth to death. An educated person means that she or he went through the process of education and is still undergoing that process. Education is indeed really important.

Through education you can have your dreams. However, dream without passion is useless. Aside from having education, try having passion, too, because when education is combined with passion you can be a better person. Passion is the urge to do something that we love and be good at it. Education, dreams, and passion result to being a better person, and having a better life. Fulfill your dreams, be passionate about it, and do it through education, for in doing what you love not only makes you successful but also contented.
