EDUCATIONAL CHALLENGE: MY PERSPECTIVE

by

Mylinne S. Ronquillo
Teacher – Jose C. Payumo Jr. Memorial High School

Education nowadays is a major challenge to us because of the implementation of the K-12 program. There are some students and parents who regarded this in negative way because according to them this will be another burden because of additional expenses on the part of the parents, but some viewed the program positively and think that this will help them choose and decide the right career that best suits to their skills.

By adding another two years in the basic education, it could help solve the problems of unemployment in our country. As part of the agency, we will embrace this changes and step by step we will build another educational foundation from the basic to the most abstract. We may encounter difficulties, but hand in hand, we will conquer the odds and reach the new horizon. And to make this possible, the administration allotted sufficient budget for Department of Education for the full implementation of the said program.

Hence, teachers play an important role in the life of students, we encourage them to reach their dreams, inculcate lots of good and positive endeavors that would help them to reach their brightest future. Being a teacher is not just a profession to facilitate the learning process. We mold our students to become a good citizen and a better person. Therefore, as educators we need to be ready to the changes in the educational system and upgrade ourselves to positively apply the best quality education that everybody should enjoy. At the end, we will produce successful graduates that is considered globally competitive in their chosen fields.
