EDUCATIONAL WEBINAR FACTORS FOR THE IMPROVEMENT OF TEACHERS’ PREPAREDNESS

by:
Derick V. Garcia
Master Teacher I, Mariveles National High School - Cabcaben

Digital learning environments are increasingly popular in education and professional training today. Teaching and learning via webinars and web conferencing are the most widely used approach in today’s era. Seminars are now web-based wherein teachers and facilitators communicate over the internet across distance using different platforms.

The Department of Education conducted various webinars in order to ensure teacher’s preparedness in the new normal because they want to guarantee the student’s learning continuity. They provided webinars on a wide range of issues providing training and support for teachers to the challenge of distance teaching in the COVID-19 environment in order to deliver relevant quality educations. Teacher’s development opportunities were given as it aims to capacitate them in the basic education learning continuity plan, and for them to stay up to date with the latest developments. Invaluable information was given including effective teaching methods, utilizing various software and applications that will surely improve student engagement, and a lot more webinars on professional development.

Teachers today are no longer afraid to do their job prior to what they felt before this school year begins. With the turned out and the response of students and parents in the learning continuity plan of the Department of Education, and with the teacher's accomplishments we can say that webinars really are a great factor for the improvement of teachers’ readiness especially now in this time of the pandemic.
