MT-I, Jose C. Payumo Jr. Memorial High School

Information and Communication Technology otherwise known as ICT has also invaded the field of education for a good cause.

Through ICT, the school has already adopted new revolutionary way of doing things like in the teaching-learning process and in accomplishing paper works.

Since computer has become an integral part of the school, the number of accomplishments and achievements has already realized.

Information and Communication Technology (ICT) has a lot of positive effects in the teaching-learning instructions. It reactivates the students’ participation and involvement to a higher level. It even stimulates their interests on various learning areas since ICT became the tool to unravel a lot of information.

The interactive media brought by ICT upgraded the educational instructions which further raised the quality of teaching thus the quality of education is attained.

Moreover, ICT provides amusements to students since they witness interactive video clips that show educational views on various subject areas.

ICT really brought advancements in the schools. It levels up the quality of teaching and learning. The passé style of teaching is replaced by dynamic computer instructions which assist the further learning of students.

The contents of teaching instructions are well-organized and comprehensive through the aid of internet. The World Wide Web makes it possible for the access of texts, films, illustrations, tables and a lot more.

Further, the diversity of learners is being addressed by ICT. The interests of different learners are well-catered because of the voluminous data that computer technology provides.
The progress in the educational system is evident through ICT. All the processes and operations in the school become more accurate and systematic. The implementation of ICT in the school brought remarkable results in the end.

Truly, ICT emergence empowers the mind and spirit of the critical minds of the new generation learners. It enables them to escalate their level of thinking and doing.

The role of ICT in the Philippine education has been realized for the benefit of the entire school and of all learners.
