EMPHASIZING GOOD ATTITUDE AMONG LEARNERS

by:
Anna Liza R. Libao
Master Teacher I, Orani South Elementary School

In order to develop the good attitude among learners, the teacher must instill endearing values that learners need to absorb and imbibe in their lives.

Reverence to God. The most important value that would shape good attitude and character in the child is being God-fearing. If one regards God as the Creator and Source of everything then they would easily realize that one needs to follow His goodness and He should be revered and followed.

Humility. Character may be more pleasing if one remains to be humble. Humility softens the heart and clears out the mind and that we should remain meek or modest regardless of status, wealth or condition.

Optimism. The teacher should motivate the child to be positive. Being an optimistic person may yield positivity in all the things that one does. So, this leads to a good attitude and a noble character.

Honesty. An honest man is one being trusted. Teachers should uphold this virtue to all the learners. If we produce a group of honest young people then conflict may be prevented. If one has honesty deep within then this will emit a good attitude and brilliant character.
Patience. The kind of students that we have to produce should have patience. If someone is patient, then waiting for the right thing and time would be easy. Setting oneself to be patient is also molding a good character.

Hard work. The teachers have to create students who have good attitude in work. It is a trait that stimulates the learners to do what are necessary. If one is obligated to work and this duty is rendered wholeheartedly then hard work is evident.

Reverence to God, humility, optimism, honesty patience and hard work are contributory in shaping a child, in directing the child’s attitude and in building one’s character.

These traits should be noted by educators to shape the leaders of the future.
