ENRICHING THE MIND THROUGH LEARNING EXPERIENCE

by:

MARIFER T. VISDA
Admin. Assistant II

Learning happens everyday. We learn from all the things that come our way whether it is good or bad. We charged it to experience that helps us enrich our minds and our lives as well.

Family, friends and colleagues play a significant part of our lives to help us grow and experience life. Experiences and insights from them offer an endless opportunities for learning that can contribute in enriching our minds. The process of learning is never ending. It has no boundaries. It would take a whole life to learn most of the things.

Through learning experiences, we develop creativity and improve our thinking skills. By focusing on our unique qualities and working on them will enhance our skills and expertise. It will also boost the process of enriching the mind. Learning experience will give us the best outcome if we can turn it into something productive or that is beneficial to all.

To enrich our minds, we also have to improve our intelligence by having positive thoughts in mind. We will not learn if we will embrace the negativity of the things around us. It will not only bring negative situations but also will cause us to live a life far from its purpose. What we think is what is what we become. We will attract more opportunities if our mind will focus on the positive aspects of life.
