The education field whether here or abroad is facing challenges nowadays. Leading the students to focus on their respective studies and providing them the best should be realized for the anticipated success.

Addressing the increasing population. The growing population is one of the primary challenges that the education sector is facing at present. The increase in the number of learners demands more classrooms, more teachers and more school materials.

Providing complete facilities. In relation to the number of learners in the school, the completion of school facilities is also one major challenge. Building classrooms and other facilities is one of the major priorities of our educational agency.

The influence of social media and technology. The student’s full attention nowadays is hard to get due to the influence of social media. The young generation of people is too preoccupied by what they see in the Facebook, in the Instagram and in the Internet.

Maintaining the relevance of education. The relevance of education should be well-explained and well-instructed to the learners. They ought to know and realize how education may change their lives and lead to their respective professions for them not to have a job mismatch someday.

Attitudes of learners. The learners now who are preoccupied by gadgets and social media are not giving more focus in the education. Helping them to be more inspired in school is one great challenge besetting our educators.

Challenges existed in order to be faced and solved. For sure the Department of Education is addressing all these concerns for the benefit of the learners. The people comprising the agency keep on innovating in order to meet the high expectations of the society.

These are the challenges in the educational field and these are ought to be addressed.
