FACTORS THAT INFLUENCE THE LEARNERS’ PERFORMANCE IN THE CLASSROOMS

By:
Mrs. Michelle B. Villapando
Teacher III-Bayview Elementary School

Learners should be actively involved in the classroom so that they understand the lesson they tackled. Teachers were made an assurance that all her learners cooperate and involve in the discussion. Here are some factors that influence learners’ performance in the classrooms as follows:

1. Motivation

Before you start the lesson, there should be a motivation in every lesson so that you catch the learner’s interest in the lesson. Make sure that all learners were participated.

2. Setting

Their seating arrangement affects their learning process. Some learners have difficulty in listening if they were seated at back. See to it that learners with difficulty should be seated at the front rows.

3. Teacher

As a teacher it is your responsibility to impart a knowledge to the learners. Even though it is hard sometimes. Just do it for the benefit of the learners. This is our job, make sure that all the learners learn and understand all the lessons you taught.

4. Method
The strategies you use to the learners where in they understand the lesson and enhance their learning. Use a strategies and methods were they can easily catch up the lesson.

5. Materials

Materials used in the classroom can be books, workbooks, and videos. Other instructional materials which develop and understand the lesson.

6. Facilities

The facilities should be conducive for learning. There were enough light and proper ventilation were in the learners were comfortable in their places.
