Describing the educational system at present is quite inspiring for there are many changes that seem to be innovative and inventive. Since K to 12 Program is now being implemented, the educational system that we have today in the Philippines is under its mandate and influence.

It is good that we have 12 years for basic education. This is not merely prolonging the stay in school by adding two more years for Senior High School but instead it invigorates and supplements learning to meet global standards.

It has mandatory kindergarten education. The kindergarten education builds a strong foundation for every child. It is preparing the learner to the next level by dealing with the child’s readiness stage.

The inclusion of Senior High School is another good point in the sense that the diverse learners will be distributed to different tracks and strands where their potential are fitted.

It makes use of spiral progression. The kind of education is very sensitive to the stages of learning. The spiral progression is best described as teaching the right competencies on a particular age level. It is just like a step by step procedure that needed to be followed.

It is a preparation for college, work or business. What is great about the new educational system in the Philippines is that it is preparing the youth for college educative, for managing a business and for future work.
It offers Alternative Learning System for the Out-of-School youth and adult learners. This is a good opportunity for them to continue school and to be productive and to become a responsible member of the society.

It includes special education to address the other learners with special conditions and disabilities. The blind, deaf and lame are given the chance to study and be fruitful.

These are the things that best describe our current educational system in our country.
