FUTURE OF EDUCATION

by:

Zaira Mae M. Villegas
Teacher Applicant, Samal, Bataan

The education in the Philippines has gone a long way since the time immemorial. There were several changes and improvements in terms of educational leaders, teachers, instructions, materials and deliveries.

A good education is a foundation for a better future.” – Elizabeth Warren. This just shows that education should continue to improve for the benefit of the learners in assuring them of a brighter future. With this concept, we anticipate the best in our future educational system.

The expectations in the educational system are more exciting to assume. For sure more improvements and advancements are in store for the new generation of learners.

The curriculum is answering diversity. The subject programs and contents are suited to the needs of different types of learners. It also designed to revitalize the knowledge and skills of the students for them to meet the demands of the school and of the society.

The educators may have achieved more professional trainings and post graduate education. The teachers are being sent to meaningful and fruitful seminars and trainings that are aligned to their expertise or specializations. They also adhere to the educational challenges in the Graduate Studies, making them as better teachers.

There will be great occurrences of innovations and high-tech instructional materials. The equipment to be used in learning would be more sophisticated and advanced. The instructional innovations are also evident in various schools.
The learners are more inquisitive and critical thinkers. Due to the existence of innovative books and other reading materials, the children in the school tend to ask more questions and are more keen in investigating the truth or facts.

Learning will be experiential. The teacher may indulge their students in practical exercises that is they will be more engaged in experiential learning or learning by doing. This may be the trend in the way the child learns.

Mentoring will play a vital part on the part of teachers and students. Peer mentoring may take the place between the school administrator and teacher, between peers and between the teacher and student.

The learners may expect a state of the art facilities. The physical amenities of the school may become more advanced, aesthetic and stable. There are more spacious rooms and accommodating ancillary features.

The technological assistance and integration may be more progressive. The software may be more updated and upgraded as to meet the demands of the school and related organizations and industries for the students to acquire the requirements of future jobs.

The school-community partnership is well-strengthened. The parents and stakeholders are more involved and engaged in school activities so as to meet the educational objectives and the progress of the school and its people.

There are some of the significant expectation in the future...in the field of education.
