It is merely a fact that God has given us a number of blessings; what we see, what we hear and what we feel in what the Creator wants. The abundance of nature from which we acquire food and water are some of His gifts for mankind.

Among these gifts, there is the greatest one, it is life itself. All such gifts depend on it. And because life is precious, we must learn how to cherish and treasure it. We have to take into consideration that it is God who represents our lives, and since God represents our lives, and since God is the greatest, we must treat our lives on the same way.

As we observe nowadays, such greatest is being neglected and wasted. There are lots of people who tried to destroy their lives because of small things such as in drugs, liquor, gamble and the like. Also there are women who get into abortion without even thinking that it is a mortal sin.

At Christmas, we must remember always that we have to find ways on which we can spend our lives in a more meaningful way. It is a real treasure and we must cherish it for we know that in our lives, there is God who always guide us for whatever we wanted to. The Creator really proves that He loves us for He gave us life.

One of the blessings we received is the gift of knowledge which will be a special tool in order for us to undergo education. Through it we learned a lot, our knowledge increase and deepen when we learn everyday by means of reading books, magazines in order to enhance what we know through the teachings done by our teachers. Aside from reading we can also acquire information through researching in encyclopedia and
It will be made easy nowadays through google/internet. There are lots of information we can gather through it where we can gather that will enhance the knowledge that we have to pass whatever course what we want to pursue in college which could be a great help for our future. If we graduated in college, their will be a big change in ourselves as well as to our family why because we can land a good where we can buy/get what we want we need in our life to help our family to have a simple or a little bit higher to our life/lifestyle now which will not be far behind to others. We can further increase/deepen our knowledge if we will enroll in masters and then to doctoral degrees to level up our educational attainment through this we don’t only increase/deepen our knowledge but also we gain friends too. Education is learning where we can share it to others, Be a simple person always even you have a high position in your field of specialization. As what it is written in the bible, be humble you will be up by our Creator and if you will not be like hat you will be down by Him through this you will not feel/ experience the Kingdom of God. It is worth fulfilling you are helping others and you will feel no worries in life.

Rodis (2018) shared a quote from Mr. Daisaka Ikeda, founding president of the Soka Gakkai International: “The proud mission of those who have been able to receive education must be to serve, in seen and unseen ways, the lives of those who have not had this opportunity.” May the experience and education you gained during your stay in the University inspire you to pay it forward, both to BPSU and to the country.

Adamat (2018) also shared to the graduates, that hey should always remember the BPSU values of hard work, discipline and respect that they were taught to live by, because as he had said in his education mantra, “Education must be grounded on Values… Education without values will not amount to the upright transformation of a person.”

God bless us always!
