In a present time, when we are in pandemic we need to be careful not only the covid-19 but to other risk such as earthquake, tsunami and many more. Our life at stakes and our things so we need to be careful. That why government and a group of people will provide some orientation and programs to we have information about the disaster and risk such as the Disaster Risk Reduction and Management.

They provide orientation about how to reduce or to avoid risk from the disaster. This orientation contain information like what to do before, during and after a disaster coming and what to do in any disaster coming. It so important to the children and teenagers or even adult because it helps to avoid the risk our life during a disaster and help them to reduce the damage of their things and their house. This help the people to have an information to what to do in a disaster before, during and after and the damage of the disaster can be decrease and this help the people be discipline. This will help the government to reduce the money that they provide to the loss because of the reducing of the destruction and the loss of lives. This help the country to became great and get up quickly. The orientation is good and informative to the children and teenagers.

In conclusion, Even we are in pandemic we need to be careful on any disaster and this Disaster Risk Reduction and Management orientation is good, important and informative it can save lives and help the country. Not only the Disaster Risk Reduction and Management orientation but all the program and orientation that government provide is good and informative so remember the information that the orientation provided so that it can help you to avoid any risk from disaster. Just follow all the order of the government.
