All human beings need to be cared and valued by significant people in our world most especially the school children who were innocent and need moral, physical, spiritual, and intellectual support of teachers which their parents unable to provide at home.

Teachers should bear in mind that they are one of the important factors in developing positivity in school that is why the students or pupils under our guidance need more support and care which is their parents cannot give them due to their overwork and other personal problems.

After series of studies had been done, it has been proven that this is the most powerful device for us, as teacher, to form discipline in our classroom. As a classroom teacher we can really determine the positive and negative behavior of our students because we are with them for eight hours a day, 5 days a week. When they feel that they are being valued and cared by their teachers they are more willing to give answers to every questions and concerns and closeness developed. Every individual students need acceptance with group.

Here are some techniques which are easy to follow for a day-to-day interactions with our students: be a mother or parents at all times who love and show affection, correct their weaknesses constructively, show care, and have a short conversation at least 5 minutes during your free time and help them overcome with their frustrations and stress.

Aside from these, it is the duty of every teacher to monitor the daily attitudes of the students most especially their participation with class discussions and other related activities. As a second mother to the students every teacher must always give them some
reminders on how to become successful in their chosen career. Always remind them that we always on their side and believed on their abilities.

With this, we can easily create positive teacher-pupil relations thus we can create also positive discipline climate in the classroom. It’s critical to remember that when you treat your students positively, they will still remember you even you are already retired and they became professionals.

Teachers should treat all students fairly and positively no matter who they are and what they are. Fair treatment includes treating students regardless of the status in life, gender, characteristics, race, and class standing.

They will never forget what had you imparted them and the reason for their success. So nice to hear that maybe someday your teachings will become their golden rule towards the reality of their dreams.
