LCP BENEFITS

by:
Eleonor K. Simeon
Teacher II, Magsaysay National High School

The Department of Education (DepEd) remains as one of the most responsive government agencies that is addressing the needs of the Filipino citizens during the time of pandemic that is why they launched the Learning Continuity Plan (LCP) which is now being implemented all over the country.

The Learning Continuity Plan (LCP) is vital in the realization of the continuous education of Filipino learners despite the current outbreak of Corona Virus in our communities. It is very admirable that DepEd became resilient and flexible in order to better serve the people most especially the ones in the young generation.

It is just right to enumerate and make known to everyone the benefits that we may accustom from the Learning Continuity Plan or LCP.

The Learning Continuity Plan (LCP) is the great response of DepEd in ensuring a continuous, safe and quality education to all the learners in the country. DepEd remains committed and diligent in serving the people in terms of education in the midst of pandemic.

The Learning Continuity Plan (LCP) considers education as the top priority in the land considering that there are alternative delivery modes to apply to continue the delivery of the curriculum to the educational clientele.

Another benefit that LCP provides to the people is that it continues to provide quality education to all types of learners even in the most remote and slum places all over
the Philippines. This shows that every learner is being given an opportunity to study even during this time that the Corona Virus is still a big threat to the people’s lives.

Because of the LCP, the parents and guardians are given more access in the participation in the field of education. These people play significant roles in the education of the schoolchildren. The voices of parents are now being heard because of the LCP.

Another wonderful benefits that LCP yields the linkage between the school and the Local Government Units. The different barangay and municipal officials are working hand in hand in the realization of continuous education among the youth.

The Learning Continuity Plan also helps in making the schools alert in the current situation by implementing safety protocols and practices within the school community so as to guarantee the safety of everyone.

Kudos to the Learning Continuity Plan (LCP) for being the bridge to the steadiness and continuousness of education in the Philippines and for giving the above-mentioned benefits.
