LESSON PLANNING: A REMINDER WHY IT IS IMPORTANT

by:

Rogeller E. Manzano
Teacher I, Nagbalayong Elementary School

A lesson plan is a working document of any teacher across the globe. A lesson is either prepared in a specific point of the school calendar or the traditional way which is prepared daily by the teacher to address the things really needed by the learner and to be planned by the teacher along the process of the teaching-learning process.

Lesson plan is very important because it allows the teacher to manage their time, effort and resources efficiently. Following a very diverse community and allowing flexibility come in.

Lesson planning gives the teacher a strong backbone of his/her day. If the teacher planned his/her lesson wisely, he/she will enter the classroom without anxiety, ready to embark with confidence and always on the go. With the help of the lesson plan, the teacher will do not have any hesitation when he/she teach the lesson because the lesson plan serves as a guide for his/her lesson on that certain day.

Lesson planning is also the teachers’ tool to know the most desirable type of teaching procedures to be used on that day. The lesson plan will dictate whether the teacher will use that certain kind of teaching strategies. Let us keep in mind that as a teacher, we need to utilize the teaching strategies depending on the content of our lesson.

The lesson plan is for teachers and students a roadmap for daily use in the classroom, a working guide, a handbook of constant use. It is based on a line of thought and action. The teacher should choose a model that suits the reality and interest of their students, that is, that is functional and effective.
A lesson plan is the instructor’s road map of what students need to learn and how it will be done effectively during the class time. It simply means that lesson plan is a teachers’ guide to execute the lesson he/she prepared on that day. Thus, these are the only few reasons why it is important in a life of a teacher. It clearly shows direction and expect unexpected circumstances inside the four corners of knowledge hub.
