LIFE-CHANGING ALS

by:
Ariel D. Cañete
District ALS Coordinator

A lot of learners in our country may have left the school because of different reasons and situations in life. Some may feel hopeless because they think that they can no longer finish even a basic education. Some may feel desperate for they lack the foundations of learning.

The Department of Education (DepEd) is well-aware of the needs of these learners and that is why it keeps on the implementation and strengthening of the Alternative Learning System otherwise known as ALS in order to make a change and a big difference in the life of an individual who needs education.

ALS is parallel to the regular mainstream in the field of education. If someone wishes to experience education synonymous to the one in school, ALS is the best option. Indeed, the basic literacy being taught in regular school is also being given in ALS education.

ALS is a practical choice most especially to those who cannot attend regular schooling. They are given more convenient time to learn and they are being given special attention by the competent ALS teachers.

ALS is an informal way of learning. It is different from the regular study set up for it may be conducted outside the school or even in the community of the learners, in barangay halls or in the homes of the learners. There are mobile ALS teachers who are always ready to serve and reach far-flung places just to give hope to those who lack education.
ALS is accessible to all, whether youth or adult may avail of this mode of education. Every learner is welcomed and accommodated by ALS. The ALS educators are the ones reaching out to find the learners who need the help and guidance of alternative learning.

ALS is productive. It works on the development and progress of the learners. By providing basic education and essential skills, the lives of ALS learners are being changed for the better.

One’s life can be changed and that is through the Alternative Learning System (ALS). ALS may dynamically offer education which is parallel or similar to regular schooling, practical, informal, accessible and productive. Though the mode of delivery is different from the mainstream set up, the heroic aim is still to develop and enhance the learners. Truly, we can say that ALS is advantageous and life-changing!
