LIFE THROUGH EDUCATION

by
Jacqueline R. Dominguez
Teacher III, Samal National High School - Main

John Dewey intelligently stated that “Education is not preparation for life; education is life itself.” This remarkable line is related to the real essence of education and what it can give to men.

The practicality of education is evident that is why every individual should be able to accept and absorb its real use and value in order to be more knowledgeable in all aspects of life.

The topics on creation and how people and the world existed is the primary concern of the field of education. The concern on creation which is being taught in the school enlightens the thinking of every man.

The environment is one of the concerns in field of education. The teachers educates us all about the environment. The knowledge in nature, plants and animals are vividly taught in school. With this, we learn the biological aspects of people and all the things that surround them.

The educational field teaches about society. This includes the different countries around the world including their respective leaders and people. Furthermore, the culture, customs and traditions are also being shared through the field of education.

The art of communication is clearly taught in every learning institution. Men are being trained to use the language whether in oral or written ways. Moreover, the learners are being oriented in the modes of writing and speaking.
The trend of technology is very essential in the everyday living of people. Since computers are prevalent nowadays. People must learn all the knowledge and information about technology in order to be fitted with the demands of work and life.

The knowledge on human beings in all of their aspects is being cleared out in the school. The philosophical, psychological, moral and physical aspects are being tackled in the four corners of the classroom. Life is much given meaning and emphasis by means of education because all matters about men are being touched.

The behaviors and attitudes of people are significant topics in the field of education. The reasons why men act the way they do and the way they perceive and look at life may be explained through education.

The physical activities of men in various fields are also being stressed by educators. These activities may provide insights and lessons so that man may be guided in doing better undertakings and accomplishments.

There are numerous things that education may share on us and what is true is that education serves as our guide in understanding, keeps us on the proper track of life helps us find success.

Indeed, Plato is correct in saying that “The direction in which education starts a man will determine his future life.”
