MATH...HOW ENJOYABLE!

by
Rowena G. Payawal
T - III, Balon Elementary School

From the start of a child’s education, Mathematics has been a part of its learning genres. This is a very interesting subject area when you learned it filled with zest or be enjoyable. Learning the basics of Math like counting, writing numbers in words, four fundamental operations, fractions, ratio and percentage are truly worthy.

You do not have to memorize long selections or books just to acquire knowledge but you simply need to compute to derive at an accurate answer. Teachers must instill in the learner’s mind the value of Math. In addition, teaching this subject let the pupils enjoy every activity that it offers. Also, tell the learners about the practicality of Mathematics in our lives. From home to market, to the malls and everywhere, Math is applicable. Moreover, a monetary system that we use daily, learned on this subject.

Eventually, the lessons in Math truly tickle the mind of every learner. From formulating the solution to yielding the accurate answer, these are challenging and enjoyable. The product, sum, difference, and quotient are so easy to get. It is just like finding the right solution to a certain problem.

It is enjoyable to work on and study Mathematics. Come on do it!
