MODELS FOR ONLINE CLASSES

by:

Almeda R. Parayo
Teacher III of Sta. Lucia High School

The upside of mixed courses is that the vital local area fabricating that works with bunch work and cooperation can occur in an eye to eye climate, which is considerably more helpful for permitting students to become acquainted with one another on an individual level.

Online courses are actually that – courses which happen completely online in which students never meet each other vise-versa. This takes into consideration greatest adaptability in learning in various areas, yet it additionally gives a few moves respects to building a learning local area. Because of an absence of eye to eye time, the learning stage is the main chance for students to become acquainted with one another and cooperate, so the working with and natural structure of learning networks should be set up more purposefully.

Models: Joining Area and Timing of Cooperations

Tech/Web-Upgraded eye to eye course

In this model, an up close and personal course is expanded with online available time, which are regularly discretionary. This course isn't considered mixed as customary eye to eye time isn't subbed with compulsory online exercises

Mixed Course (customary)

This course shows progressing offbeat online exercises, with consistently planned eye to eye class times all through the quarter.
Conventional Online Course

This online course shows something almost identical to the above Tech/Web-Improved course, with discretionary online gatherings for available time. More normal is an online course with week by week coordinated gatherings, for example, an online class, which takes into account ongoing discussions and cooperation among students and teachers.

Mixed Course with Coordinated Gatherings

This illustration of a mixed course shows vis-à-vis direction, and a coordinated internet meeting (typically an online class) for finishing introductions. The reset of the time is a customary web based learning experience.

Independent Learning

This model of distance schooling was one of the first to be executed. Indeed, even before the appearance of online advances, students could get to readings through the mail or later on, VHS accounts of talks, complete tasks and readings, and mail finished materials back to an educator. As exploration in the Learning Sciences gave more understanding into the affordances of social constructivism and collective learning, this methodology has seen a decrease, however it still exceptionally famous in the business MOOC space (like Lynda.com), especially for individual advancement where the use of information doesn't generally need a social scene.
