MY TEACHER, MY HERO

by:
Celia A. David
St. Francis Elementary School

Being a teacher is a full of challenge. But we have to rise above all these challenges. Because as what the former DepEd Secretary Ricardo Gloria said, "Be proud you're a teacher, the future depends on you." Without teachers there can be no other professions that will rise up. So, as a teacher we have to do our best to bring out the best in our pupil. we have to do more sacrifices to be able for us to give our children the right path to cross.

Teachers in our country can be treated as hero of every Filipino. They are the one who share their time in molding the minds of children. They served as a second parent in school. And everybody knows that the responsibility of teachers are very difficult because of many expectations. They need to become a role model for their pupils and to the public. They must show good values in order to earn the respect and love of people and do good things. Teachers also give their best when it comes to their profession but unfortunately, certain incidents put them in a very difficult situation. Being a teacher, is not easy but they consider it as a challenge and at the same time as a fulfilling blessings because for them they are mentors with full of enjoyment and satisfaction to their works. We can also say that teachers are human who commit mistakes but willing to learned and accept those endurances to become a better public servant. It can now be truly said that the nation owes the teacher an appreciation and recognition because of their heroic role.
