OPTIMIZING CHILDREN’S DEVELOPMENT

by:
Arlene N. Guiao

Teacher III, San Ramon Elementary School

Holistic development. This is what teachers should prioritize in developing their pupils. They should bear in mind that their task as teachers is to facilitate the development of every child to the optimum and to the maximum. The following are highly suggested to optimize children's development.

1. Reach out to all children without bias and prejudice.
2. Make every child feel good and confident about him through his experiences of success in the classroom.
3. Help every child master the basic skill of reading, communicating in oral and written form, arithmetic and computer skills.
4. Teach subject with master.
5. Inculcate or integrate the unchanging value. Teachers who consistently perform the above-stated suggestions are great. A teacher who takes steps to maximize the potentials of the learners is truly a blessing!
