OUR TEACHING GOALS

by:
Marites P. Tria
Teacher III, Orani North Elementary School

A teacher should know what to track on way to teaching goals. There are essential things to be considered in service to the youth.

Teaching Goal #1. Inspire the learners. Teachers should inspire the students to learn. Though proper encouragement and motivation, a child is invited to study and spend more time in learning.

Teaching Goal #2. Teach the mastery of skills. Teachers are expected to teach skills and knowledge for the mastery of the learners. Let them embrace the things they owe to learn for their development and growth.

Teaching Goal #3. Mentor young minds. Teachers not only teach lessons but they also serve as advisers who shape the character of every child. They also guide the students in leading proper paths in life.

Teaching Goal #4. Help students to be confident. The teachers also inspire the child to be confident in everything they do. They boost the morale of the learner leading to their self-confidence in facing life challenges.
Teaching Goal #4. Facilitate discovery. The teachers should facilitate the discovery of the students for them to be more knowledgeable and well-acquainted with all the things around.

Teaching Goal #5. Hone talents. One of the teacher’s roles is to hone the talents of the students whether in creative art or sports. This could be instrumental in building their confidence as to pursue better careers someday.

Teaching Goal #6. Teach good values. Commendable values should be taught to students. They deserve to learn the core values that would make them as better individuals.

Teaching Goal #7. Shape good attitude. It is necessary to learn good attitude. This attitude must conform to values of humility and kindness. Once these values are taught by the teacher, the students become more humble and sympathetic.

Teaching goals are set for teachers to follow and indeed they are essential.
