Bantan Elementary School

Parents and pupils tandem will definitely results to attaining a good academic performance in every school in our country. The best solutions to intensify pupil’s elementary education as great foundation is to raise parent’s involvement in it. They must work cooperatively for attaining every learning experience particularly this time where proper guidance and motivation in accomplishing the learning task provided. Not all teachers are parents but all parents are teachers.

Parent’s involvement is very important because they have to reinforce what pupils have to learn in a particular learning modules that offers the most essential learning competencies prerequisites for them to learn. Being the primary teachers of their children, they must work together with the teachers. If case may provide them the opportunity to have open communication with the teachers in order to have monitoring on the learning phase of every pupils. The children could sense the connection between their parents and make a strong realization on what are the benefits of being diligent in accomplishing the task provided through the assistance of their parents.

The greatest impact of parent involvement is the effect of self-esteem and strong family ties. Parents would know that they play a vital role in the achievement of their children and they could devote most of their time not only for recreation but for educational purposes. Their children have learn meaningfully through their time allotted not for parenting purposes.

Involvement of many parents is desirable since parents can be trusted to care for more than anyone else for the quality of education that their children could receive. What
is essential is direct involvement in decision making with teachers. This involvement will serve as an avenue higher level of understanding and more actions which tend for their strong support. There is a felt need that the parents and their children must cooperate with one another.

Parental involvement plays a vital role in the academic development of their children. The more they devote their time and effort in guiding their children in utilizing the learning modules learning process will takes place at a higher level of achievement. Pupils will be more responsive to the task given without pressure since there are parents that monitor the progress and assist them in times of clarifications.

Parent’s action in education is important in time of Pandemic. It is imperative that they should take active participation in the educational endeavor of their children. Teachers provide instruction for them and must be reinforced at home. Parents and their children must be a teaching team with similar goals and objectives in education. With this tandem scholastic achievement will be enhanced. Parents plus children in homes equals higher academic performance of pupils in school that will results to have a productive citizen of our country.
