PICTURE OF INNOVATIVE LEARNING ENVIRONMENT

by:
Gloria C. Alquizar
Teacher III, Hermosa National High School

The learning environment for 21st-century learners should be innovative and ideal. The kind of environment that these learners need should be in unity with time and their learning needs.

The innovative learning environment is evolving. This means that it keeps on changing in response to the needs of the time, most especially for the sake of the education of the learners.

Adapting to educational practices is another feature of an innovative learning environment. This shows that the environment for learning is being transformed to suit the needs of the students, in their subjects and with their topics.

The innovative learning environment supports strengths-based teaching that reinforces the teacher’s pursuit of quality teaching. By having the necessary materials, aids, and equipment in the learning place, the teacher may excel in teaching the learners.

Invigorating the process of learning is another distinct feature of an innovative learning environment. By having fun, lively and dynamic activities in the learning environment, the students may enjoy every moment in school.

The innovative learning environment offers the students and teachers flexibility in managing the classroom, ubiquity of useful undertakings, and connectedness of learning materials and facilities.
Engaging practices are also present in an innovative learning environment. Collaborative work, sharing of ideas, and showcasing improvement and growth are examples of present practices in this kind of learning environment.

An innovative learning environment may be described according to its distinctive capacities, techniques, materials, and advantages.

This is the clear picture of an innovative learning environment that the students at present may savor for their best benefits.
