PROFESSIONAL ADVANCEMENT

by:
Sylvia D. Gatus
Teacher III, Orani National High School

A teacher or any educator should not remain stagnant or complacent with what they initially achieved as a professional. They need to continuously grow and work for their professional advancement.

Endowing with responsibilities is a good way to grow professionally. Being able to accept duties willingly and wholeheartedly is such a good practice for a teacher to be professionally advanced.

Knowledge sharing is also a good means to gain more brilliant thoughts and ideas in order to grow in the profession. Having regular intelligent conversation with colleagues is helpful in this sense.

Attending seminars, trainings, conferences and symposium is found effective in professional advancement. Hearing varied resource speakers and trainers would surely add to one’s knowledge, skills and aptitudes.

Prioritize professional growth through further formal studies like attaining a master’s or doctor’s degree in reputable learning institutions that offers quality and advanced education.

Continue reading various materials which are found educational and intellectual in nature. Reading adds up to one’s intellect and leads to a broader understanding of the different things in the world.
Exposure to varied activities is also beneficial for a certain professional teacher. This would make him or her more confident and prepared in facing the other challenging activities in the field of education.

Being updated with technology because it is really the trend nowadays. Having competence or proficiency in the use of technology is a good asset of a professional teacher.

Professional advancement may certainly be attained by being able to follow the suggested steps. A teacher may continuously group through the said means.
