RESPONSIBILITY...Deal or No Deal?

by:

Alicia O. Javier
Teacher I, Peas Elementary School

Teacher- noble professions, who develop and mold a child for a better future. School days, a time for preparation of school materials, paper checking and a lot of uncontrolled mixed emotions.

Sometimes, we come to the point of refusing all the works that should be done at that very moment. Sometimes, I say yes and it is my passion and sometimes I want to give up because of lot of work.

Most people work to support their family and meet their family and meet their necessities. They work for love and dignity. Surprisingly, some take the job for the thrill and just for the fun of it.

However, we have different duties to perform, and goal in life, but whether we work for our self-fulfilment or not, we should not bother to think about it, because we’re doing it for our family, and for the whole society, particularly for the children who look up to us as a perfect role model.
To sum it up, we as professional and got a better job we need to enjoy it because destiny will lead us for a life that we can satisfy our needs in the future.
