SIGNIFICANCE OF TECHNOLOGY IN TEACHING PROFESSION

by:
Maria Teresa M. Cawigan
Teacher III, Sta. Rosa Elementary School

Technology is very important nowadays, it has both tangible and intangible benefits that will help teachers in the daily routine. Educators are now relaying to the technology as it makes the work easier. There are countless reasons why technology is a key aspect of learning in the school. Whether we like it or not we need it to survive in the fast changing world.

Technology is considered essential for the learning environment. Computers, laptop, tablets, cellphones and other forms of technology bring on collaborative resources for the teacher that is not available in the book. The use of technology in teaching becomes more interesting with virtual lessons, through a video, or when using a gadget. Having access to other information outside of the book is a great help in the teaching processes. Teachers can cope up with creative ways to teach the learners that keeps them engaged. It is a big help to make teaching more meaningful and fun.

Every learner has a different nature of learning and the teacher has difficulty in this situation, Technology is an aid with this breach, it has the capability to enrapture relationship, it binds a good and harmonious communication between the teachers and learners. Technology is necessary in the teaching profession. It is a primary part of the daily routine of the teacher. It has built itself part of every facet of lives today. The teacher who understand the technology are the ones who succeed as professional of the so called “New Era”.
