Social media is considered as one of the greatest inventions in this modern time. It serves as the connectivity among people not only in our country but also across the globe. Social media particularly Facebook has created a big impact in the lives of people and of the students as well.

The world has been transformed into an interactive communication planet among people through social media. On the part of the students, social media is not only being utilized to socialize and simply meet people online but it is more than the advantages that one may think. Social media may be truly instrumental in the acquisition of knowledge and may also be useful in spreading or sharing of knowledge. In just a few seconds knowledge may be accessed and it can also be sent to others.

The power of social media can be used to share one’s thought or concept that could have a huge impact on others’ lives. The concept may develop an inspiration or it may motivate one to be more determined and persevering in life.

It can satisfy the social needs of the students. Since a lot of young people are by nature sociable, this channel of communication could be very expedient. You can meet a lot of people from all walks of life through social media.

It can create interlacing connections and networking. Social media may connect people and groups of people for one common purpose. They could do productive and worthwhile things thus attaining better goal with a great purpose.
It could be a good channel or platform for advocacy. The students may exercise their freedom in promoting world peace, global equality, just treatment and even fair opportunities. They can even use social media in caring for the environment, for the health care of people, for bully-free society and people's safety.

It could build friendship among students not only locally but internationally. It is better if they meet students from different races and other nations. Social media can keep them in contact with different people in order to better understand their traditions, ways and cultures.

It is used for online studies. Indeed, education online is one of the latest trends today. More accessible education can be supplemented by social media. Through social media, the teacher and students may meet electronically.

Education knows no boundary and social media makes it happen. Through social media, education is not solely confined in school but it is learning life through global perspective.
