One of the major causes of poverty is the weakness in employment generation and the quality of jobs generated in our country. Based on the Macro Poverty Outlook for East Asia and the Pacific report, the World Bank projected that poverty incidence in the Philippines at 20.8 percent by the end of 2019. Because of the increasing population rates with a high volume of inequality many researchers believed that poverty levels were strongly linked to educational attainment.

As education is considered as one of the fundamental factors of development. It lifts people’s productivity and creativity and promotes entrepreneurship and technological advances. It plays a very vital role in securing the economic and social progress of the Philippines and at least improving the income distribution.

As the Government establishes Alternative Learning System, our country will be able to face different challenges. It will improve the literary skills in reading writing and numeracy, provide civics, vocational efficiency and livelihood programs. These will definitely lessen the burden of the government on unemployment. Alternative Learning System guaranteed that it will help the citizens in our country, especially the emerging generation to pursue their dreams even if there is a manifestation of indigence in the present time.

Alternative Learning System provides a practical option to the existing formal instruction. If a person does not have or cannot access formal education in schools, ALS is an alternate or substitute. This program will provide all Filipinos the opportunity to
have access to and complete basic education in a mode that fits their distinct situation and needs.

Because of the growing population with lack of education, persistent ALS teachers continue to knock the doors of every household to ensure that each member of the family is guided with learnings that will help them to get through poverty and go after their dreams. Ensuring that no one will be left behind in education will probably help our country to get rid of hardship in life.
