TEACHER ABSOLUTE CLASSROOM - LEADING TO MOST LEARNING

by:

Alina P. Lacson, MAED
Teacher III, St. Francis Elementary School

Learning is an enjoyment. Yes, if the following are present, coupled with a very good teacher who knows how to elicit responses from learners towards remarkable learning:

Teaching-Learning materials availability. Sufficient tools, equipment or the like must be necessary provided, or you want the rest would just miss the chance of learning during the process. Yes, each learner must have his materials available.

Instructions/Directions are clear. To avoid confusions among learners, directions or procedures must be clear. Particularly during examinations, the teacher must ensure that before the start of the test, learners must have been well-oriented about the directions: encircle the letter of the correct answer, or underscore the phrase, or box the whole item, something like that.

Motivated Parents. Without the full support of parents regarding the teaching style of the teacher, teaching will not be remarkable. Whenever the teacher has a plan about this at that lesson, parents must understand the reasons behind, etc. in order to avoid misunderstanding between the teacher and parents.

Supportive Superior or Principal. Effective communication is a must. Without which, a Teacher could be misunderstood by his superior regarding his programs, styles, and strategies and so on. This could bring about friction between them and the teacher, feeling misunderstood or what, would not accomplish much in his Teaching.
Inspired Learners. With a good teacher, learners would definitely appreciate learning more positively than with unmotive one. Yes, jolly teacher is more effective than someone who is not. Make sure a teacher is one happy and creative purveyor of learning.

Collaborative learning is essential. Group work, study group, and so on must be utilized inside and out of the classroom. Project-making must be included in the curriculum wherein 5 or so learners are tasked to accomplish something out of their lessons. Yes, with this strategy, learners are not only experiencing learning collaboratively, but also meaningfully.

Recognize Achievers. To answer the learners need for recognition, the teacher must have a system of recognizing best work. Efforts spent by learners must also be appreciated, though, their work is not that remarkable against used standard.

Well, with teacher’s desire for effective learning to his learners, every challenges that comes his way is treasured as opportunity for better improvement.
