TEACHERS AS A MORAL GUIDE

by:

Florence R. Nazareno
Teacher III, Pantalan, Luma Elementary School

In the classroom, teachers are more than mere tutors. A teacher's position as a moral guide in the life of a student reaches beyond the classroom. It has been compared to the work of a sculptor, who forms the sculpture with ability and experience. Similarly, a teacher's position as a moral guide, directing a student's dreams and ambitions, is critical.

An instructor, in other words, maybe a friend, philosopher, and guide. Teachers have been lauded for their role in upholding society's moral compass. The moral agent function of a teacher is universally admired. A teacher can foster voices of sanity, empathy, and harmony in a world rife with abuse.

Despite this, technology has ushered in a new age of learning opportunities and altered the course of education. The old school classroom culture has been replaced by smart learning and creative teaching methods. Not only that, but the student-teacher relationship has grown as well.

Nonetheless, a teacher who feels society is their duty is at the heart of education. The greatest gift in educators is their contribution to a child's future. The value of a teacher's position as a moral guide cannot be overstated, and they deserve nothing less than our gratitude.
