TEACHING KIDS TO BE SCIENTIFICALLY INCLINED

by:
Isabelita A. Pantig
Teacher III, Paraiso Elementary School

Science is one fundamental learning area that is certainly beneficial to the kids of this generation. Teaching them to appreciate, love and imbibe the subject would make them scientifically inclined.

Tell the kids the life skills that science provides. The abilities to conduct experiments, to observe and to draw conclusions are not only useful in school but also in science related jobs someday.

The opportunity to explore things most especially the ones in the environment is a fulfilling experience. Going to different places and observing places in search for knowledge and truth are experiential learning.

In their visits to different surroundings, have the child to be more observant and critical. Have them formulate questions on the things around them. Sharpening their curiosity is one way to make them become more interested in science.

One effective strategy to employ is to expose the students to various science books, materials, tools and equipment. This is a way of showing that science has wonderful ideas and instruments that relating to man and to the world.
The showcase of the products of science is stimulating. There are so many things that we enjoy nowadays that are created because of science. From our basic needs to the gadgets that we use, all of these are fruits of science.

Featuring the famous scientists in the class and their accomplishments is meaningful. This would not only raise awareness but also set the inspiration that would affect the child’s interest in science.

Make it sure that science has a strong impact on kids’ life in school for it would make them scientifically inclined.
